

New Product

New FOAM ATOMIK set for bottom compartment of all ATOMIK cases

Part n.: FOAM ATOMIK
List Price: 21,00 EUR
EAN code: 8024482172965

The FOAM ATOMIK set is composed of 3 pieces precubed (cubes 15x15 mm) foam layers 30 mm thick, 1 piece foam layer for the base 10 mm thick (not precubed) and 2 pieces foam inserts 30 mm thick to be used only to fill the side slots of the ATOMIK WHEELS bottom compartment. The FOAM ATOMIK will be sold separately as an accessory.

To put in place this foam set, just remove the bottom compartment dividers and push in the foam layers in the sequence as shown on the above picture. Here below we show how it will look with the foam. This solution can help to better store and safely transport measuring or testing equipment, together with the tools inside one case.
