Desoldering pump

SA21A Desoldering pump Desoldering pump

SA 21A Manual desoldering pump

With the hand-held desoldering pumps a vacuum is produced by means of a piston, cylinder and spring force. The piston is tensioned manually and secured automatically. The piston is moved back suddenly by pressing the release button and a vacuum is created briefly so that the soldered joint is freed of liquid solder.

TOP ATTRIBUTES

- Length 200 mm
- Metal housing
- antistatic
