

Difference between the **WSP 80** normal heater element to the :

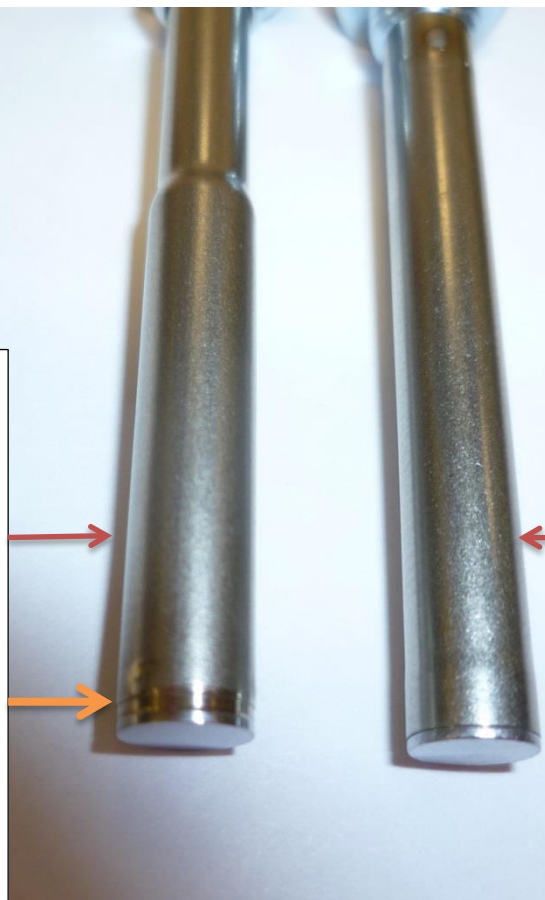

WSP 80 robust heater element

**ROBUST WSP 80
heater element**

Differed is making
a other tube-form
with more stability

A special metal-
ring is added
behind the silver-
plate for more
stability

**NORMAL WSP 80
heater element**

All this features should give a better stability the heater element , if people don`t / can`t working softly with the soldering iron. It`s more used in the Solar-Technology...
