THE **RELIABLE** EXPERT

For over 60 years, you – our clients and partners – have been our main focus.

Finding ways to satisfy you has constantly and naturally guided the evolution of the Fischer Connectors global family business, whose strong culture is defined by these words: **Expertise, Reliability, Innovation.**

To date, we have placed our expertise at your service with **more than 30,000 references across our four product families:** Core, UltiMate, FiberOptic and MiniMax.

To give each of you easy access to these high-quality connectivity solutions, we have developed a **worldwide sales network** backed up by production and **cable assembly facilities in Europe, North America and Asia Pacific.** Aiming to continually improve your satisfaction, we have devoted the past decade to modernizing our company, innovating in both products and manufacturing systems, and meeting your quality and reliability requirements quickly and effectively.

Proud of satisfying more than 10,000 active clients per year, we look forward to partnering with you to grow your business with our reliable and innovative connectivity solutions.

fischer[®]
CONNECTORS

THE RELIABLE EXPERT

At Fischer Connectors, we firmly believe that selecting the right connector for the right application is an important detail that, when designed into your projects, can have a significant impact on how people live and work, both locally and globally.

When you team up with us, you place your trust in an expert partner who understands your unique needs, designs applications in a streamlined and cost-effective way, and ensures you have a rugged, reliable solution. **Our unmatched focus on developing rugged connector and cable assembly solutions and on the innovation of products and business processes sets Fischer Connectors apart.**

Expertise

Guiding you from concept to delivery:

- Sustainable **supply chain** efficiency
- Performance via **lean manufacturing**
- Process control and **continuous improvement**

Reliability

Getting you where you want to be:

- **Products** that deliver quality over time
- **Service** that ensures on-time deliveries
- **Support** that responds quickly to your requests

Innovation

Helping you work smarter:

- **Technology** that speeds up production and delivery
- **Solutions** that help you overcome your challenges
- **Customer-first approach** that saves you time and money

ANY SIZE ANY CONFIGURATION ANY APPLICATION

Over 20,000 references covering a multitude of applications: from standard to highly technical or complex ones.

Ideally suited for:

- Broadcast
- Defense & Security
- Energy
- Industrial
- Instrumentation
- Medical
- Transportation
- Volume programs

FISCHER **CORE** SERIES

FISCHER CORE SERIES **BRASS**

- Highly configurable
- High performance interconnections
- Available in sealed and vacuum tight versions

FISCHER CORE SERIES **STAINLESS STEEL**

- Corrosion and radiation resistance
- Decontamination and sterilization performance
- Easy handling with gloves

FISCHER CORE SERIES **ALULITE™***

- Lightweight, 50% lighter than brass equivalent
- Chromium plated aluminum for best chemical resistance
- Any size and body style for any integration

** Other colors are available on request.*

FISCHER CORE SERIES **PLASTIC**

- Sterilizable
- Corrosion resistance
- High performing plastic materials

FISCHER CORE SERIES **DISPOSABLE**

- Cost-effective single use plugs, fast cable assembly
- Reliable and faultless handling
- Modular or turnkey solution

FISCHER CORE SERIES **BROADCAST**

- Optimized for broadcast cameras
- Outstanding durability
- The best of Triax

AT YOUR SERVICE

For more than 60 years, Fischer Connectors has been helping customers re-imagine their connection solutions to create more competitive, innovative and cost-effective products:

- State-of-the-art products and solutions
- Latest manufacturing techniques
- Best-in-class global customer service

VALUE-ADDED SERVICES

FROM LOW TO HIGH VOLUME BUSINESS

Since 2008, Fischer Connectors' headquarters in Saint-Prex, Switzerland has been home to an **ultramodern lean manufacturing facility**, able to produce our connectors in high volumes at an **affordable cost**:

- Logistics and **on-time deliveries**
- World's best **supply chain** technologies
- High **customer service** standards

CABLE ASSEMBLY

By choosing us for both connectors and assembly solutions, you can significantly save over the cost of handling multiple vendors. Our **worldwide cable assembly network, located in Europe, North America and Asia Pacific**, ensures short lead times and high quality standards:

- **Complete** solutions
- **Total** support
- **One-stop** shop

CUSTOM SOLUTIONS

We love solving engineering challenges, coming up with unique and highly innovative solutions, tailor-made to your needs. From initial concept through prototyping, testing, manufacturing and installation, we work closely with your development team to turn that seed of an idea into a perfect, functioning product from:

- **Initial concept** through production
- Connectors and cabled solutions to **finished goods**
- Custom solutions to **high volume business**

TECHNICAL DATA

Carefully defining your interconnection performance requirements is critical when selecting the ideal connector:

- Locking systems
- Sealing categories
- Materials
- Voltage limits
- Power and Signal
- Contact types

TECHNICAL INFORMATION

ORIGINAL PUSH-PULL LOCKING SYSTEMS

Fischer Connectors' original push-pull automatic locking is widely adopted by the industry for its ease of use, safety of mating and speed in connection and disconnection.

PLUGGING

The plug has an outer sleeve, with flexible fingers, which slides forwards and backwards along the plug body.

WHEN CONNECTED

The beveled edges are firmly captured by a locking groove located inside the receptacle.

PULLING THE CABLE

The beveled edges of the fingers are forced into the groove, securing the connection.

UNPLUGGING

Pulling on the outer sleeve of the plug unlocks the latching mechanism.

OTHER LOCKING SYSTEMS

LANYARD

Combines push-pull automatic locking with an emergency release lanyard.

QUICK-RELEASE

Designed without a locking mechanism for emergency release.

FRICTION

Designed without a snapping mechanism.

TAMPERPROOF

Features an integral safety locking ring to prevent unauthorized or unintentional disengagement.

SCREW-LOCKING

Enables firm locking by circular movement with the plug's outer sleeve and receptacle feature threading.

SEALING CATEGORIES

The IP (Ingress Protection) classification system provides a reliable method of comparing relative levels of sealing between various connector products.

The protection level offered by a typical envelope is described in IEC 60529, published by the International Electrotechnical Commission (IEC). While the first number describes the level of protection from solid objects, the second one relates to protection from liquids.

Tests performed during the design and qualification of Fischer Connectors' environmentally sealed products are standardized to IP68 at a depth of 2 meters and for duration of 24 hours. Fischer Connectors' hermetically sealed products achieve IP69.

The digits indicate conformity with the conditions summarized in the tables below.

IP RATING

SOLIDS

0	Non-protected
1	 Protected against solid objects greater than 50 mm
2	 Protected against solid objects greater than 12 mm
3	 Protected against solid objects greater than 2.5 mm
4	 Protected against solid objects greater than 1.0 mm
5	 Dust protected
6	 Dust tight

WATER

0	Non-protected
1	 Protected against dripping water
2	 Protected against dripping water when filled, up to 15°
3	 Protected against spraying water
4	 Protected against splashing water
5	 Protected against water jets
6	 Protected against heavy jets
7	 Protected against immersion effects
8	 Protected against submersion
9	 Protected against intense water jets

Example:

IP68

INGRESS PROTECTION

COMMONLY USED SEALING LEVELS

- IP50 Indoor / Unexposed applications
- IP68 Watertight sealing
- Hermetic sealing

Each requires different sealing levels and, therefore, different connector solutions.

IP50 INDOOR / UNEXPOSED APPLICATIONS

Typically for indoor or industrial applications, the required sealing level is IP50, since the device needs to be protected against dust but not exposed to water.

The IP50 rating can be improved with additional accessories like boots or protective sleeves.

IP68 WATERTIGHT SEALING

Typically for applications requiring outdoor use where they might be exposed to water submersion, rain, sand, mud or any other environmental stress.

HERMETIC SEALING

Typically for applications requiring gas tightness like vacuum applications and pressurized vessels, immersed for long periods of time or exposed to strong jets.

100% of the hermetic pieces are tested with a leak testing instrument to ensure a leak smaller than 10^{-8} mbar l/s.

HOW TO CHOOSE YOUR RECEPTACLE BODY STYLES

Front and rear projecting

- Depending on whether you need the space saving inside or outside the device
- Also available in front or rear mounting

Front and rear mounting

- Depending on how you need to process your assembly
- Rear mounting is commonly used for PCB mount

IP68 watertight or hermetic designs

- Hermetic has a specific sealing material for best sealing under high pressures

Feedthrough

- Hermetic panel bulkhead feedthrough

MATERIALS

SHELL MATERIAL

MATERIAL NAME	BEST FOR	TEMPERATURE	MAIN ATTRIBUTES
Chromium-plated brass	Ruggedness	-100 to +200°C	Salt mist and mechanical resistance, cost efficiency, electrical conductivity
Aluminum	Lightweight	-100 to +200°C	Lightweight
Stainless steel	Cleaning / Radiation	-100 to +350°C	Corrosion resistance, surface cleanability, nuclear radiation and mechanical resistance
PEI	Sterilization	-65 to +200°C	Sterilization in autoclave, EtO, Cidex, gamma radiation, Steris®, Sterrad®
PBT	Insulation	-65 to +135°C	Electrical insulation, low temperature manipulation
ABS	Cost efficiency	-20 to +65°C	Disposable solutions, medical applications

CONTACT BLOCK MATERIAL

MATERIAL NAME	BEST FOR	TEMPERATURE	MAIN ATTRIBUTES
PEEK	High temperature	-65 to +200°C	High temperature, high chemical and high radiation resistance
LCP	High temperature	-65 to +200°C	High temperature and high chemical resistance
PBT	Cost efficiency	-65 to +135°C	High chemical resistance, cost efficiency
PTFE	Electrical insulation	-65 to +160°C	High dielectric strength, high chemical resistance
ABS	Cost efficiency	-20 to +65°C	Disposable solutions, good stability

O-RING & SEALING MATERIAL

MATERIAL NAME	BEST FOR	TEMPERATURE	MAIN ATTRIBUTES
FPM (Viton®)	Hermeticity	-20 to +200°C	Acids, weather, ozone, fuels, mineral and silicone oils, high vacuum, gamma rays
EPDM	Low temperature	-50 to +160°C	Alcohol, weather, hot water, vapour, detergents, gamma rays
NBR	Oil resistance	-30 to +110°C	Acids, mineral oils, petrol, weather, detergents
FVMQ	High temperature oil resistance	-55 to +200°C	Mineral oils, alcohol, weather, hot water, detergents
TPE	Soft accessories	-55 to +130°C	Very resistant, except to aromatic and chlorinated hydrocarbon
"U" Type Resin	IP68 sealing	-55 to +200°C	Mineral oils, acids, alkalines, inorganic saline solutions
"E" Type Resin	Hermeticity	-65 to +150°C	High chemical and radiation resistance

DATA TRANSMISSION

SYMBOL					
Protocol	USB 2.0	USB 3.0	Ethernet Cat 5	Ethernet Cat 6	HDMI
Speed	60 Mb/s	625 Mb/s	1Gb/s	10Gb/s	-
Required contacts	4	9	8	8	19

For more information, please visit www.fischerconnectors.com or contact our technical support team.

A/Z POLARITY

To protect users from contact with dangerous voltage, most of Fischer Connectors' products are available in two versions:

STANDARD A POLARITY

The contacts of the receptacle are protected against accidental touch.

Recommended when voltage is present on the receptacle.

INVERTED Z POLARITY

The contacts of the plug are protected against accidental touch.

Recommended when voltage is present on the plug.

TEST VOLTAGE & OPERATING VOLTAGE

BREAKDOWN VOLTAGE

Maximum voltage difference that can be applied before the occurrence of a disruptive discharge between mutually insulated portions of a connector or between insulated portions and the ground.

TEST VOLTAGE (or withstanding voltage)

Voltage level at which the connector is tested during the qualification test. This value represents the upper physical limit. It is usually set at 75% of breakdown value.

OPERATING VOLTAGE (or rated voltage)

Voltage under which the connector will actually work in the equipment over the normal expected lifetime and in typical environmental conditions.

CONTACTS & ACCESSORIES

SOLDER CONTACTS

Most versatile
Pre-installed contacts
Qualified assemblers required

- Can be produced with any type of contact block material and accept a wide range of wire sizes.
- Contacts are pre-installed in the insulator block, and the wires can be terminated with any appropriately sized soldering iron.
- May require operators who are qualified in specialized soldering techniques.

PCB CONTACTS

PCB or Flex circuit mount
Reduced pin diameter
Wave soldering

- Designed to be mounted directly onto a PCB or flex circuit, can be used in wave soldering operations for faster production assembly.
- Preferred for high rates of data transmission due to the low distance to the board that their integration allows. This helps reducing signal perturbations.
- PCB pins are generally used on rear mounted panel connectors.

CRIMP CONTACTS

Selectively annealed area
Special tools required
Limited range of wire sizes

- Each contact has a selectively annealed area which is deformed during assembly by specialized tooling to assure proper termination of the wire to the contact.
- Commonly used for field termination or repair, as no soldering process is required.
- Not available for sealed or hermetic connectors.

STAMPED CONTACTS

High volume
Automated cable assembly
Disposable applications

- Optimized for very high volume and automated cable assembly.
- Come on specific reels to be accommodated in automated cable assembly machines.
- Mainly used in disposable applications due to their limited number of mating cycles.

FIBER OPTIC BUTT-JOINT CONTACTS

High optical performance
IP67 unmated
UPC & APC polishing

- The FiberOptic termini rely on butt-joint technology commonly used in the telecom industry to ensure ultra-low insertion and return losses.
- A unique sealing feature on the termini allows easy cleaning and device protection even unmated (IP67) without compromising on the alignment once mated.
- Guaranteed, tested and certified optical performance platform using high precision polishing process.
- The alignment sleeve parts are located in a removable mate adapter for easy maintenance, replacement and cleaning.

OVERMOLDING BEND RELIEFS

STRAIGHT BEND RELIEF

High-end quality feel
Straight & right angle
Wide choice of colors and materials

RIGHT ANGLE BEND RELIEF

Straight & right angle cable orientations available:

- Can accommodate a wide range of cable diameters
- Polyurethane material for ultra-ruggedness
- Silicon material for ultra-cleanliness
- Best protection to improve cable flex life

CABLE BEND RELIEF

High-end quality feel
No tooling required
Wide choice of colors

Tool-free terminations for field installations:

- High quality and improved protection
- Wide range of colors for easy cable identification
- Can accommodate a wide range of cable diameters

PROTECTIVE SLEEVE

Improved protection
Ideal for dusty environments
Improved sealing

Improves mechanical protection
on the whole interface:

- Prevents contamination of the locking mechanism in highly dusty environments
- Improves sealing efficiency in submerged applications
- Covers both plug and receptacle

HEAT SHRINKING TUBE

Protection to exposed wires
Ideal for quick prototyping
Bend relief protection

Allows submersion with adhesive versions:

- Enables quick prototyping
- Can accommodate a wide range of cable diameters
- Can match multiple cable output

Over 30,000 references covering a multitude of applications:
standard, volume programs to **highly technical or complex ones.**

FISCHER CONNECTORS, over six decades of **Expertise, Reliability** and **Innovation**

A pioneer in connector technology, Fischer Connectors has kept the spirit of innovation alive for more than sixty years. We are known for our breakthrough technologies, high-quality products and highly responsive customer service.

We fully support companies build reliable applications by designing, manufacturing and distributing high performance, rugged circular connectors and cable assembly solutions. Our innovative circular push-pull connectors are known for their reliability, precision and resistance to demanding and harsh environments.

With our primary manufacturing facility in Saint-Prex, Switzerland, and cable assembly facilities in Europe, North America and Asia Pacific, backed by our global engineering and customer support teams, we are able to expertly serve customers throughout the world.

WARRANTY & DISCLAIMER

Save as expressly provided otherwise, any technical data provided by Fischer Connectors in this document, in hardcopy or electronic form, shall be provided for information purposes only. In no event may Fischer Connectors be bound by or liable (including in case of errors) for any technical data contained in this document, in hardcopy or electronic form, unless such technical data is expressly guaranteed by Fischer Connectors.

Fischer Connectors shall not be liable for damages to the products or services resulting from assembly process, installation or testing performed by the purchaser or any third party upon the purchaser's request, or damages due to other action or process performed on the products or services by the purchaser or any third party upon the purchaser's request which fails to comply with Fischer Connectors' instructions or which are otherwise beyond Fischer Connectors' control. Fischer Connectors shall not be liable for any defect or failure of Fischer Connectors' products or services which operate in accordance with specifications, illustrations, descriptions or other particulars due to combination or use of Fischer Connectors' products or services with any incompatible equipment or product of a third party.

Refer to www.fischerconnectors.com for the General Terms and Conditions of Fischer Connectors.
